Software Engineering Important Questions

II BTech I sem R20 Regulation

I UNIT
1. What is Software Engineering and Challenges of Software
2. What is Software Engineering and Write about Software Myths.
3. Define the Generic view process of Software Engineering
4. Illustrate the Process Framework with Umbrella Activates
5. What is Software Process and Types of Software Process Flow
6. Explain the Waterfall model
7. Explain the Evolutionary Process models
8. What is Rational Unified Process Model
9. What are the Specialized Process Models

II UNIT
1. Explain the Requirement and Types of Requirements
2. What is Requirement Engineering and Illustrate the Requirement Elicitation
3. What are the Fact Finding Techniques in Requirement Elicitation
4. What is Structured Analysis and define the DFD and Decision Trees in that.
5. What is Structured Analysis and Define the method of it
6. What is Data oriented Model and Explain the ER Model in Analysis
7. What is Software Requirement Specification (SRS).
8. What is Requirement Engineering and Define the Requirement Validation in that.
9. What is SRS and characteristics and Structure of SRS
10. What is Requirement Analysis and Define the Object Oriented Analysis.

ALL THE BEST

HAVE A NICE DAY
